

CLEAR BRACES HELP CEO PERFORM CONFIDENTLY IN BOARD ROOM

Invisalign for adults proves it's never too late for creating your best smile

“Great Smiles professionalism and care for their patients shines through in so many ways, and it makes me feel good that they’re involved with giving back in the community as they are.”

– Grant W.,
Invisalign patient

The Problem – After having braces as a teenager, Great Smiles patient Grant started experiencing slow but steady crowding of his lower teeth. This eventually caused his upper front teeth to shift and many problems seemed to follow; more frequent cheek biting, difficulty flossing and concern for his overall dental health became a major issue.

The Solution – Great Smiles' Invisalign treatment made getting straighter teeth a quicker, more comfortable experience for Grant. Through personalized care and open communication, Grant was comfortable throughout the process and developed an immediate sense of trust in the Great Smiles staff. As a business owner juggling a busy life, Invisalign through Great Smiles with 3D modeling allowed Grant the peace of mind he needed that his confidence in meetings would not suffer.

The Result – “To say I’m happy with my orthodontics from Great Smiles would be an understatement. It’s so apparent how much they care to make things just right, and that’s what’s happened for me,” said Grant. After a short treatment time, both the upper and lower teeth were straighter, flossing was easier and concern for his oral health disappeared.
